Storyboard Walkthrough From User Standpoint:

1. As an user, I will log unto the home page first using URL www.masslottomicroscope.com. I will see navigation bar to the left, which will direct me to all the webpages present on the website.

   Additional Information should include how to review the statistics provided, and brief presentation where data is coming from.

   1B. As an user, I would go on the "History" webpage to understand a brief history of lottery, plus see web links to lottery system.

   2A. As an user, I can take a look at lottery generated graphs to see how the patterns of frequency and volume of winning numbers have been in the past. If I wish to have more information particularly for raw files, I can go to the Statistics webpage and proceed to download files, or see other facts based on stored historical lottery numbers.

Added for sprint1: As an user, I also can either select or filter for more dynamic or interactive graphs.

   2C. As an user, I can find out download raw files, and derive my own equation. I can also find out other fun facts based on historical lottery numbers, and find out my probabilistic birthday values.

   2D. As an user, I can determine how valuable this website is and make the necessary donations with radio buttons for my selected values.

   2E. As an user, I can contact the administrator with additional questions or request more information.

   3. As an user, if I want to create an profile and post comments, and create my own security question and answer as well.

   *Removing the log on due to time constraints.
